PROFESSIONAL OVERVIEW

3 years of programming experience in designing and implementing secure applications and API's using C#/.NET Core. Proficient in working with microservice architecture and API development to ensure seamless user experiences. Always eager to learn and apply new concepts to build innovative solutions.

SKILLS & TECHNOLOGIES

HTML, CSS & JavaScript | C# | .NET Core | React JS | PostgreSQL | SQL Server | RESTful API

PROJECTS

Movie Reservation System

- Developed a .NET core Web API for managing movie reservations.
- Implemented CRUD operations for movies, showtimes and reservations.
- Integrated JWT Auth for secure user access.
- Used Entity framework core with a PostgreSQL database for data storage.
- Designed a RESTful API structure with request validation and error handling.
- Frontend created with React JS.

E-commerce App

- Designed and developed an API for an e-commerce platform enabling user registration, product management, and secure checkout.
- Integrated JWT authentication for secure user access.
- Implemented shopping cart functionality, including adding, removing and viewing products.
- Integrated a payment gateway for seamless checkout.
- Tech Stack: **Express.js, Node.js, MongoDB, React.js**

Anime information app

- Integrated the **Jikan API** to display seasonal, upcoming and top anime.
- Utilized React.js on the frontend for easy browsing and interaction.
- Built the backend using **JavaScript** for data fetching and processing.
- Tech Stack: **React.js, JavaScript.**

EDUCATION

DIPLOMA | IT Database Development | CTU Training Solutions
